ABOUT ME

A creative and versatile graphic designer with a strong foundation in digital design, a broad technical skill set and proficiency across various design software. I bring valuable experience from social work environments, excelling in both team collaboration and solo projects with confident communication in social settings.

Outside of design, I am a dedicated mixed martial artist with a background in dance and four years of experience in acting, singing, and stage performance, showcasing my creativity, discipline, and ability to perform under pressure. I also have years of experience in catering and customer service.
